

## **May 2015 Florida Testimonies**

See the link for Mission Philippines for those testimonies. The following occurred while we were in Florida.

A woman had pain all over and her left leg was about 3" shorter than her right. God grew out her leg, her arm, straightened her hips and shoulders, and removed all pain! Thank you Jesus!

Friday afternoon I felt led to stop and visit a friend at his store today. We chatted for a while and then a couple he knew came in. It turns out she has macular degeneration in her left eye. I asked if I could pray for her and she said yes. With permission I placed my hands near her eyes and prayed. We commanded the spirit of blindness to leave it for macular degeneration to go. For her eye to be healed and for perfect sight. I asked her how she was feeling what was happening. She said she just felt strange and she had goosebumps over. I explained that that was the Holy Spirit in her healing her body we talked about the fact that Jesus wants her healed and Holy Spirit was healing her. I had her open her eyes and check her eyesight and she said she could see better. Then we talked about that Jesus promised healing and that she would see progress over the next day or even longer. And that she should be thanking Jesus for her perfect eyesight daily. If the enemy tries to come and tell her she is not healed that she needs to kick him out. In Jesus name. I guess stopping at that store was an appointment from God and not a chance encounter. Praise God.

A man I was talking to said he did not understand how a replaced knee could hurt. I asked him if I could pray for him. He said sure and reminded me that I had prayed for him a while back when he was in tremendous pain with a kidney stone. He told me Jesus completely healed him and has never had a problem since. I laid my hand on his knee and

commanded healing and for pain to go. All pain left his knee. Thank you, Jesus.

A woman working next to me at a food drive had a wrist brace on her right arm. I asked if I could pray for her and was able to hold her arm and fingers. She said her fingers were in a lot of pain. After commanding her muscles, ligaments, tendons, and nerves to be healed and for all pain to leave. All pain left. Thank you, Jesus!

A woman walked into the meeting last night with a pain in her arm her back. I laid hands on her arm and back and most of the pain left and I repeated it on her arm and all of the pain left. Later that evening she mentioned a pain in her neck. I had had a pain in my neck in the same spot since earlier that day. When I laid hands on her neck and commanded the pain to go it left her and in a few minutes left me as well. Had a word of knowledge about a toothache on the bottom right and a man at the meeting had been experiencing pain there all day long. We laid hands on his jaw a couple of times and his pain was gone. Thank you Jesus.

At a meeting during the week I had a couple of words of knowledge before the meeting and shared them during the talk. Many came forward after the message and received healing. Headaches left, arms grew out, legs grew out, arms were healed, eyes were healed, shoulders and more. Thank you Jesus for changing my talk and for healing your people.

Friday I was helping a woman with her computer in her home. She was telling me about her memory loss and I asked if I could pray for her. She knows I just returned from the mission trip to the Philippines and said yes. I asked if I could put my hands on her head. I commanded the brain cells to be restored and her memory to return to normal. I could see Holy Spirit working in her and asked what was happening. She said she felt tremendous heat. I told her that was Holy Spirit working healing her. Then

I found out a number of other issues she was dealing with like an ulcer, Fibromyalgia, neuropathy, arthritis, and more. I addressed each of these and commanded spirits to leave and healing. She is a believer so I talked with her about the authority she has to pray for herself and what to do if any of the symptoms return. Also made sure she knows not to get off any meds until the doctor gives an okay. Thank you Jesus for giving me yet another opportunity to have you work through me.
