

September 2015 Kentucky and Florida Testimonies

My cleaning lady came today, Tuesday and before she arrived I received a word of knowledge about a headache. Sure enough she did have one. I bound pain and cast it out in Jesus' name. It instantly went! Praise God.

House of Blessings on Tuesday morning. Very small crowd today; first of the month. I blessed a few people and greeted them all. One of the workers who I had prayed for before was having trouble sleeping. I prayed with her and declared in Jesus' name that she would sleep through tonight. Another woman had a brace on her left calf. I asked her what was wrong and she was having pain in her legs. I bound that pain and cast it out in the name of Jesus. The pain left and I instructed her what to do when it tries to return. That she has the authority to cast it out.

Went to a ministry that meets on Tuesday evenings called Second Life. It is an outreach of the Methodist Church in town. They have some praise music, a short message, and then a simple meal for all to enjoy. Many of the people I know from the House of Blessings were there. I got to sit with them and later went around and said hi to those I knew. I prayed for one man and his wife. He has Parkinsons and she is his caretaker. We prayed for his healing and for her to have peace and strength through her caretaking time.

Went to a methodist church in Florida on Saturday night and was able to pray alongside another believer for a young woman with hip issues. Her legs were off about an inch and we commanded healing in her hips and an adjustment. Her legs grew even and pain left. After service another believer and I prayed for a man lower back pain. As I laid my hands on his back he felt heat from my hand as I commanded pain to leave and for his back to be healed. All pain left. Thank you Jesus.

Wednesday evening I gave a brief message and a summary of my ministry trips over the summer months. Called for healing and many came forward and were healed. I asked others to come forward and pray with people. One woman I prayed for had knee and back pain. After persistent prayer all pain was gone. Her husband had hip and rotator cuff pain, Could not raise his arms over his head or behind his back. Grew out his arms. Prayed for his hips. All pain left and he was able to raise his arms and place them behind him. Thank you Jesus. There were prayers for deliverance. Others for pain. And I gave two young women prophetic words. Praise God! Just before I left a woman with a knot in her left foot came to me for prayer. I had her remove her shoe and show it to me. I held her foot and put my fingers on that knot and commanded it to break up and be gone. Thank you Jesus

Friday evening service at a church in Florida I was called forward to pray with a young man with an allergic reaction to something that caused hives. Also had one leg short by an inch. We commanded the spirit causing the reaction and for hives to leave. Then we grew out his legs and they both became even. Spoke to him after the service and taught on what to do if things return; the authority he has in Jesus. As I was leaving a woman filled with the Holy Spirit came

to me to with pain in her lower back. I put my hands on the area of pain and bound and cast it out. All pain left. Thank you Jesus!

Wednesday evening at a church service in Port Charlotte the woman who last week had a knot under her foot testified. We had prayed commanding it to go. She testified tonight that the next morning she was taking a shower and it fell off. Praise God! Prayed for a woman with stress and as I prayed she felt everything falling off her. Was able to follow up with a couple we prayed for last week. They still had little of the same issues. Prayed for them again and all of it was gone. Then I had them pray for each other and encouraged them to do that at home. Prayed for many others with physical or emotional needs, needs for healing in relatives, needs for financial provision, and more. Lastly I prayed for another woman with a pain under her three middle toes on her left foot. I had her remove her sandals and I placed both hands on that foot commanding the healing to take place. She walked a bit and said it was all gone except for one spot. I had her lift up her foot and put her finger on that spot. Then she prayed and it totally left. Thank you, Jesus.

Thursday morning I had breakfast with a friend. Afterwards I was able to pray for him for back issues and tenseness. He felt lots of heat from my cold hand as I commanded healing in his body. When I finally released my hands he was relaxed and feeling fine.

Thursday afternoon I teach at a local computer club. When I arrived and was setting up for my class one of the volunteers was having problems with her left shoulder. I asked what was wrong and she gave me a long explanation about what the doctors were doing. I asked if I could pray. She was not sure so I asked again. She allowed me to put my hand on her shoulder and I prayed commanding the healing. She was better but not quite fixed. She said the pain moved to her other shoulder. I explained that was a spirit and I prayed again. I then had her stretch out her arms and they were off about an inch. We prayed and they came into alignment. Then I had her raise her arms over her head. Her face lit right up and a big smile came onto her face. All pain was gone and she had full mobility. I made sure she knew it was Jesus and not me. She mentioned arthritis so I explained that was a spirit as well and cast it out commanding all damage be restored. Thank you, Jesus!

At a Saturday evening service two women came up to me for prayer. The first was just told by her doctor that she has cancer in her right breast. I had her place her hands on her right breast and I put my hand with her permission on hers. I explained that cancer was a spirit and not from God. We bound cancer and cast it out. We took authority over the words spoken over her by the doctor and talked about who she is in Christ--healed and set free of cancer. The other woman had questions about the rapture and was afraid she was not worthy to go. I reminded her of who lives in her and who she is in Christ. We are worthy because of what Jesus did for us. And she has been speaking to others about Jesus and wanted more boldness. We prayed for her to have more boldness and wisdom as she reaches out in the market place. Thank you, Jesus!

During worship a woman came to me with pain in her right bicep. I laid my hand on her and bound

pain cast it out. Then I commanded the muscles tendons ligaments and nerves to be healed and restores. All pain left.

Again during worship, a team of us went to a man scheduled to begin radiation treatment in his lower region. We cast out the spirits of infirmity and death and declared healing over him.

After service a team of us went to a local hospital to lay hands on a woman with kidney failure going through dialysis. We spoke healing over her declaring a creative miracle of two new kidneys. Thank you Jesus.

While in the driveway my neighbor came by and complained about his shoulder. He usually does not complain about anything. I have asked before if he or his wife would like prayer and they shrug me off. Most of their days are spent back and forth to doctors. Today he let me lay hands on his shoulders. I bound pain and cast it out, but he remained in pain. I know the healing power of Jesus has gone into him and expect him healed. I proclaim full restoration, in Jesus name.

Thursday afternoon a woman I was eating with at lunch spoke about a lesion she was told she had in her right lung. I took her hand and in the name of Jesus commanded that leishman to seal up and for her lungs to be clear. Thank you Jesus.

Saturday afternoon a group of us laid hands on a woman with sinus issues, earaches, headache, hard spot in her left breast, kidneys, and bladder issues. We command healing from top to bottom including sinus healing, new kidneys, fully functioning bladder with the muscle being healed, and for the spirits of death and cancer to be bound and cast out. For the hard spot to be removed. Taught on what to do next.

At a healing service tonight a woman came up to support her older daughter as she came for prayer. While she was receiving prayer I asked the mother if she needed prayer. She said yes, her left hand could not open or close correctly and she had pain in her arm. Two of us prayed with her commanding her healing, binding and casting our pain. After two prayers she had a little bit of pain let and was able to open and close her hand with just a little soreness. I had her lay her own hand on the other hand and command the pain to completely go. It left. Then I taught her how to pray for herself, in the name of Jesus.

Then I walked around the church looking for whomever the Lord had for me to pray with. I asked an older woman and she revealed that she had been having sickness and had not been able to come to church because of it. We were able to cast that spirit of infirmity out and she felt much better.

Then I saw a couple. She was sitting down and he was standing praising God as the worship team played. I asked if she needed prayer. She had pain from her right knee down to her foot. And she had plantar fasciitis in both feet. In Jesus' name we bound and cast out the spirit of

pain and commanded the plantar fasciitis to be healed. The pain left her knee and was still in her foot. We commanded to leave, again. All pain was gone. Thank you Jesus.

A team of us prayed for complete healing for a woman from the top of her head to her feet and for cysts in her body to dissolve. Thank you Jesus for her complete restoration.

Before we left a team of us laid hands on a woman in a wheelchair. There was a long list. I laid hands on her feet and she felt tingling. Then another team member took over with her feet feeling electricity in her hands. I laid my hands on the woman's hands as she laid them on her belly. Her husband told us she had calcium in her belly area . As I commanded the calcium to be removed the woman told be she was feeling tingling on her sides where the open wounds were. Holy Spirit was all over her touching all the parts needing a touch. She stood up out of the wheelchair, but was not confident to walk more than one step. We know that we know that she was touched and that Jesus is healing her completing the work He as begun. As we were walking away she excitedly proclaimed that she could see the angels again. Praise God!

Wednesday evening I preached on the Seven Healing Myths. After my message I called people forward who wanted healing and called the team we have been working with to lay hands on them. There was much healing going on. I do not know about most of it. I prayed with a number of people. One woman had a pain in her back and chest/ribs. I had her place her hand on her chest while I put my hand on her back, with her permission. We bound pain and cast it out. Most of the pain left her back and no more existed in her ribs. I had her put her hand on her back and commanded the pain to go. There was still a little left. I had another woman place her hands on the same place and more pain left. I touched her back again and thanked Jesus. All her pain was gone.

Then a man came up with lower back pain. I had him sit down in a chair and checked his legs. His left leg was almost two inches longer than the right. I commanded his legs to grow out and be even. I spoke to the the pain and cast it out and commanded the back to be straightened and strengthened, in Jesus' name. His leg grew out and all pain was gone after he stood up and tried to touch his toes. Thank you, Jesus.
