

## Summary March 2016

Prayed for one lady with pain in her knees

Testimony of a man who we prayed for a couple of weeks ago. He had been told he would need a screw in his right wrist due to a bone that was not healing correctly. Praise God he went back to the doctor and is healed without a screw.

I was helping someone with their computer and he reminded me that I had laid hands on his shoulder at the computer club a few months ago. He has been in a lot of pain and after prayer all pain was gone. Since then he has been back to the doctor who took xrays and told him that his shoulder was pretty messed up, but he has full mobility and no pain. Thank you Jesus!

One person tonight received healing prayers for a number of issues including graves disease, eyesight, degenerated disks, back pain, sciatica, arthritis, and more. She testified that when we had prayed in the group months ago and her legs grew out that they have stayed the same. Praise Jesus. Another woman received healing prayers for her eyes as well and for arthritic hands to unfold. Thank you Jesus.

Woman with pain in hands came up to me before service. I prayed commanding the pain to to leave. Some relief. Found out it was starting behind her shoulder down to her hands. Prayed with no change. Checked hers arms and one was over an inch shorter. Grew out her arms and told pain to leave. All pain gone. Thank you Jesus. Another woman was dealing with sinus issues. Command them to dry up and for all infirmity to go. Spoke to her after service and fher sinus were dried up and clear. Praise God.

The worship pastor testified to a miracle in his life the result of prayer. Here is the testimony: <https://youtu.be/E9rPZtGMqgo>

While meeting friends for lunch I ran into a man I know from one of the churches I attend. He had some pain in his neck. We prayed for a few minutes and most of the pain left. Encouraged him to continually thank Jesus for taking away the pain.

During the prayer portion tonight one woman was delivered of arthritis and pain in her hands. She was able to close her hands tightly which she could not do before. Her worst time is when she wakes up and her hands are clenched taking a while to open. We believe a good report is coming when we see her next week. Thank you, Jesus. Her

husband was dealing with a number of issues including pain in his knees, pain and an impending operation on his left elbow, unable to raise his left arm past his chest level, and COPD. When we finished his elbow did not hurt, his knees were fine, and he was able to raise his left arm over his head. He was also breathing deeper. Praise the Lord!

Wednesday I was able to pray for a person with back issues. Not a solid walk with the Lord; a non very practising Catholic. But he was receptive to prayer. I laid my hand on his back and commanded the pain to go and for healing in his discs that were the issue. He found some relief but still had some pain left. I believe the Lord will finish the work and that this man will come back to a relationship with Him. Praise Jesus.

During the hands on one woman who was healed last week came with pain in her back this time. The pain last week was still gone. We laid hands on her back and after a couple of times it was all gone. Another received healing in her feet and could tell that her walking was now without a limp. She also received prayer for a headache and pain that was moving around. We cast out the spirit and all pain was gone. Another was dealing with graves disease which has to do with the thyroid and was manifesting in her eyesight. She is taking much less medicine and we agreed in prayer with her that she will be off all her meds by here next doctor's appointment in three months. Thank you, Jesus for working amongst us all this evening.

A woman came up to me asking for prayer because she had a hip replacement and one leg was shorter than the other. The doctor told her she needed to wear a lift. I had her sit down and checked her legs. The left was over an inch shorter than the right. I commanded it to grow in the name of Jesus. Also spoke the pain she was experiencing. The leg grew out. I laid hands on her back and bound and cast out the pain commanding her back to be straightened and strengthened. Than she mentioned arthritis. We bound it and cast it out as well and commanded anything damaged by arthritis to be healed. Thank you Jesus.

Woman with a shoulder with pins and a metal plate. Getting twinges of pain. After a quick prayer, no more pain. Woman who had had two hip replacements had fallen and dislocated her new left hip, twice. The doctor put it back in place and told her it would take months for the pain to go. After two quick prayers Dr Jesus took it all away! Woman with fused discs in her back was in constant pain. She also had bursitis pain in her hips. When I laid my hands on her back, with permission, she felt heat from my hands hands. She also had right leg nerve damage. Once again she felt heat. No difference in her right leg, yet. All the pain in her back and hip was gone. A woman with cataract in her left eye and pain in her spine. All pain was gone after prayer. Taught her

on praying for herself. Then found found out she also dealing with sugar. I commanded a creative miracle of a new pancreas. The a man come with back pain. Gone gone after a quick prayer. He also felt heat. Checked his legs and found his right leg was a half inch shorter. The Lord aligned them quickly. One man came with gallbladder issues. Prayed for healing for his bladder and for pain in urinary track to go. A woman asked for prayer for her left arm. Something about nerve issues. So we commanded numbness to go, in Jesus name. Most of it left right away. Then a woman who needs two new knees came. We prayed for a creative miracle. Holy Spirit was strong over her and all pain left. We were able to pray with many others for a blessing in their lives. Thank you, Jesus for allowing us the opportunity to pray for these, Your children.

Had a man coming to the Computer Club this morning. After working with him for about an hour I asked why his arms and hands were shaking. He told me it was inherited from his mother and his daughter had it also. He did not have a name for it which I thought was interesting. I asked him about prayer and he got a little defensive thinking I was going to try and convert him to some religion other than the one he knew. He told me he was a Catholic but does not go to church. I asked him if he knew Jesus and he said well yes of course. He claims Jesus as his Lord and Savior. He agreed for me to pray with him but was not expecting any results. With permission I laid hands on his shoulder and said a brief prayer and then commanded the shaking to stop and for the spirit of inheritance to leave. Of course, all in the name of Jesus. There was no change in his shaking according to him but I did notice that it seemed to have lessened a bit. I explained that the Lord's healing power had gone into him and not to be surprised if the shaking went away. I will see him again soon and fully expect a healing in his body. Thank you Jesus for another opportunity to watch You work.

The man I prayed for yesterday was doing a lot less shaking today. Praise God.

I prayed for a woman who was having a tough time with the daughter at home. Prayed for God to bring peace into that situation. I asked her if she had any physical needs. Her response was I can live with the pain. I asked her where the pain was and she said she had had a back operation and that she had pain in her back I asked if I could pray for her and asked permission to place my hand on her back. In the name of Jesus I commanded that pain to leave and never come back. She was in tears and asked why I stopped to pray for her. I told her as I was walking by her the Lord prompted me to stop and pray for her. I prayed for a young autistic girl. She was out in the hallway because she couldn't stand the loud music. After prayer and casting out the autistic spirit and filling her with peace she came into the sanctuary right down to the front where the music was loud. Thank you Jesus. Prayed for a woman whose mother was having

failing kidneys. I lifted her mother up in prayer and commanded healing in both kidneys, thank you Jesus. I was able to bless a number of others who weren't ready to receive any specific prayers. Another woman came up to me and asked for prayer. There was a problem with the lenses in her eyes. The doctor had replaced her lenses and she wasn't seeing right. They want to bring her back in and reverse the process. Well in the name of Jesus I proclaimed perfect eyesight, for those lenses to be heeled, to be reset. We bound and cast out the spirit of blindness and proclaimed perfect eyesight. Thank you for Jesus for all you did tonight and all you're doing in those that were touched by just standing there, soaking in the praise and worship, engulfed in your presence.

A woman came up to me before service with pain in her upper spine neck area. We laid Hands on her neck and commanded her back to be straightened and strengthened and for her discs to line up. For pain to be bound and cast out. She rotated her neck and pain was gone except for one little spot like a knot at the top of her right shoulder. I put my finger on it and commanded it to go and it left. All pain gone. Thank you Jesus. Later in the evening another woman came up to be with pain in her back. I sat her down and checked her legs. Yes, they were off about an inch. I commanded the back to be healed and for the legs to grow. After about a minute the legs were even and all pain was gone. Thank you, Jesus!
