

Testimonies April 2019

Sherri had a word of knowledge for a left wrist. Two people came forward and both were healed as she commanded healing in their wrists and hands. Thank you Jesus.

Met a man who had had a stroke that ended in some some memory issues. I commanded restoration of his memory and for a sound mind. For strength. In Jesus name.

Woman's left eye blurry. Laid my hand on her eye and commanded the blurriness to leave and for the spirit of blindness to leave. In the name of Jesus.

Word of knowledge about headache. Laid hands on woman with a headache commanding it to leave. Prayed twice and it totally left. Thank you Jesus.

Woman with hearing loss. I placed my hands on her ears and commanded the spirit of deafness to leave and for restoration of her hearing. I took my hands off and she told me she could hear much better.

Woman with numbness in leg and hip. I commanded it to go and for whatever was causing it to leave. She had not been having the numbness at the time but I know she was healed.

Man with diagnosis of cancer. Spoke directly to the diagnosis and told the spirit of cancer to begone and for the bombardment of negative thoughts by the enemy to leave him alone. In Jesus name he is healed.

Man with injured left wrist. Complained of pain. After I took care of his computer issue, I asked if I could pray with him. He said yes and I held his

wrist. As soon as I grabbed his wrist I could sense Holy Spirit at work. I commanded his muscles, ligaments, tendons, and nerves to be healed and for all pain to leave. I held onto his wrist for a while as he soaked in the presence of Holy Spirit. He said I reminded him of his grandmother who was known as the village healer. I let go of his wrist and asked him to move it. He told me of the pain in his left little finger. I held it and commanded the pain to go. We worked for a few more minutes and I asked how his wrist was. He said it was much better. Thank you, Jesus.

Woman with arthritis. Pain throughout her body. I testified to the healings I have seen and then took her hands. I commanded the spirit of arthritis out of her and for all damage restored. Had her make fists. Pain gone. Still some in her neck. I placed my hands on her neck and commanded her muscles tendon ligaments and nerves to be healed and for all pain to go. When finished all her pain was gone. Thank you Jesus.
