

# Testimonies May 2019

Woman with pain in her right hip. Laid hands on her hip and commanded the muscles ligament tendons and nerve to be healed. For all pain to leave. In the name of Jesus. Had her walk and move her hips. All the pain was gone.

Lady with a large cut on her left arm. Asked permission to touch her arm. Commanded supernatural healing. In Jesus name.

I was asked to say the blessing and gave a short talk on abundance. I was good to see those we have ministered to in the past. I was able to pray with many as I went from table to table.

Woman with missing disc and neck pain. Laid my hands on her neck and commanded a creative miracle, a new disk, for total restoration, and the pain to leave. I took My hands off her and in her amazement, all pain was gone. Thank you, Jesus.

An older man was dealing with arthritis in his neck according to the doctors. I declared his neck healed, for all damage by arthritis restored. For all pain gone. Pain left. That you Jesus.

When Sherri and I sat down at church this morning she complained of a large amount of pain in her back. I placed my hand right in the small room back which was exactly the spot. I did not pray. I just left my hand there until she said the pain was all gone. Thank you, Jesus.

I write a lot about other people being healed. It happens close to home as well. This morning my right knee was hurting as I walked. I commanded the pain to stop. Did not work. After a little while, I asked Sherri to grow out my legs. As she commanded she saw one leg grow out about a half inch. She

reminded me to get up and walk. Sure enough, no pain since then. Believe it and receive it thanks to Jesus.

Prayed for a woman with wrist pain, I commanded the pain to go and for her muscles, ligaments, tendons, and nerves to be healed. When I released my hand from her arm, she said it was much better.

Another woman was having trouble breathing and was coughing. Others went to her and one suggested we call an ambulance. I laid hands on her and commanded her blood pressure normal and for her lungs to be clear and healed and for her oxygen level to be 100%. In the name of Jesus!
