

Testimonies October 2019

Woman with leg and back pain. With permission I placed my hand on her back and commanded healing and for the pain to leave. When I took my hand away the pain was almost all gone. She spoke about the heat she felt from my hand. I prayed once more and had her stand and walk a few feet. All pain was gone. Thank you Jesus.

Woman came in with a swollen and hurting left foot. We laid hands on her foot commanding the swelling to go down and for all pain to leave. She walked across the room and the pain was almost gone. We prayed once more and the pain was gone and the swelling down. Praise Jesus.

Mission Trip To Ethiopia With Sherri

I prayed for a woman who had breast and neck pain. Pain left. Also, I grew out her left arm and then prayed for protection for her family.

I prayed for young lady who complained of chest pain. When I laid my hand on her chest her heart was pounding like 160 bpm. I had Elizabeth lay her hand and feel as I commanded a new heart and for her body to be restored. We felt her heart stop and start back in normal rhythm. Her eyes told us she felt the healing take place and the tears rolled down her face.

An older lady told me she had diabetes and uterine cancer. I prayed for a creative miracle and for her to be filled with new pancreas and for all cancer cells to be killed and flee in the name of Jesus. Such powerful connection.

A mother brought me a 3 year old girl who was deaf in her right ear and had me pray. After praying three times she started reacting to sound and was healed. God was on the move.

I prayed for a teen girl who had been shot on R. side. She was left deaf, damaged arm, side, and thigh. I am assuming it was from the metal that

was still in her. I commanded for anything not of God to leave her body in Jesus name. The pain left but the ear was not responding so I called on Dave to pray with me and after several more times the hearing was starting to return. Praise God.

I prayed for a woman with rectal issues and hernia. Commanded restoration in Jesus name and all pain to leave.

I prayed for a man with diabetes. Commanded new pancreases and normal sugar levels.

Lastly that night a young guy came over and bent down. I thought he was asking for a kiss as he was pointing to his cheek and so i reached up and kissed his cheek. LOL I think I saw a black man blush but his tooth ache left... what blessings we all received tonight.

Man complained with knee pain. Grew out leg. Commanded pain to go in Jesus name.

Man complained of neck pain to I grew out his arms and commanded tendons ligaments and nerves to all return to original state as when God first created him. Neck was moving freely.

Prayed for young baby boy with a fever and cough. Coughing stopped and fever left by the time we were leaving that evening. This was also the evening that I gave out the neck ties to the pastors. Wish I had taken a hundred more. I also gave seeds to the lady over the cooking for a church garden project in the future. What a day of learning for them and us.
