

## **Testimonies April 2016**

Prayed for a pinched nerve in a woman's neck. It first moved to another location, then with more prayer it was much better.

Prayed for a man who could not lift his left arm up past his shoulder. We grew out his arms. They were off about an inch. We came against the pain and commanded healing in his shoulder. Had him lift both arms and his movement returned. Praise Jesus.

Another was having trouble with his left thigh area. Grew out his legs about an inch and commanded the pain to go. Pain left. Yay God.

Woman came up to me with a pain in her lower back and had me place my hand there. I commanded the pain to go and for the muscles and tendons to loosen. All pain left. Thank you Jesus.

While at a hardware store I was able to pray with someone and their wife having cold like issues.

Was able to pray with a woman after church for pain in her right leg. After a quick prayer and having her walk around all pain was gone. Thank you Jesus!
