

Testimonies December 2016

I ran into the woman I laid hands on a few weeks ago for arthritic pain in her hands. Still not pain. Praise Jesus! And I was testifying as to what Jesus did in KY and spoke about healing diabetes and she said "I need that." So we cast out the spirit of diabetes and commanded a kick start of her pancreas and for all sugar levels to be normal.

Saturday afternoon I prayed for a woman's mother in proxy. She was having pain in her knees. I laid my hands on her daughter's knees and commanded full healing and no more pain. Then I prayed for the daughters elbows, for any arthritis to go and for the pain not to return. She received a phone call and I was able to pray for a man who was in KY over the phone for pain in one of his feet. The pain left after commanding it and arthritis to leave. God is good.

Sunday morning a man was experiencing pain in his right rotator cuff. Doctor said he needs an operation as he tore it. I laid my hand on his shoulder and commanded healing, full mobility, and for all pain to go. He raised his hand over his head with ease; a feat he could not do before the healing. Praise God!

Then a woman was telling me about the numbness in her left arm. Doctor had no idea why but gave her something to take. I laid hands on her arm and cast out arthritis and the pain and the numbness. Arm was fine when Jesus finished with her. Thank you, Jesus.

Tuesday evening received the following report from the pastor at the church in KY I ministered at a couple of weeks ago. One of the older ladies you prayed for at the healing service called me to tell me that her sciatica has completely stopped hurting and she has felt much better since the service. Good reports. One of the ladies you prayed for over the phone has improved dramatically since receiving prayer. I expect more good reports soon. Yay God!

Monday visited friend at rehab center again. Prayed with her thanking God for her continued improvement. Also was able to pray healing for her roommate who was dealing with a number of issues the biggest was having a bladder problem that requires her to have a bag. Prayed for her complete healing.

Received this email from the pastor at the church I ministered at a couple of weeks ago.

More healing being reported...

Got some good reports today. Older lady that got prayer at healing service called me and said her sinus condition was completely gone. Her hip had hurt 1 time but thinks the devil came to steal her healing. She set him straight & no more pain. Her nephew who had had cancer is much improved. All infection gone & pancreas size shrunk. He's eating & has gained weight. Also my husband Micah has had no more pain in his knees. God is still at work. PTL!

Sunday evening I was struggling with an issue with my leg and they all prayed for me. It was not instantly healed and they saw that. They also saw that my condition had nothing to do with Holy Spirit moving. He filled my mouth with words and taught His people and He healed them. Two men were healed of ringing in their ears (tinnitus) that had been going on for a long time. And there were backs and knees and other issues God took care of as well. They laid hands on each other and saw God heal as they witnessed legs and arms growing out and saw how to test for carpal tunnel as we taught on techniques and why we use them on occasion.

Thursday I was asked to pray for a man with back pain. I laid my hand on the spot and commanded the pain to go in Jesus name. Most left. One more shot and as he walked forward all the pain left. Thank you Jesus.
