

## **Testimonies February 2016**

Monday evening I was able to pray with a man who told me he lives with his pain. We commanded healing in his body. Then a woman with difficulty opening and closing her hands came to me. I felt it was arthritis so I bound and cast out that spirit commanding all pain and achiness to leave. Thank you Jesus.

Friday morning I taught computers at a local gated community. One woman I was helping after class had arthritis and pain in the back of her neck. She is a believer. I asked permission to place my hand on her neck. After explaining what I was going to do and confirming who is in her, I bound the spirit of arthritis and cast it out. Then I spoke to the neck and commanded healing. After moving her head back and forth and up and down, she said it was much better. I asked if there still was pain and she said yes. I had her place her hand on her neck and had her pray as I led her with the words. ALL pain left and the look on her face was priceless. Thank you, Jesus.

At a Saturday luncheon I was able to pray for a woman with a broken right wrist commanding the bones to be fused together and for the surrounding muscles, ligaments, tendons, and nerves to be healed and normal. Thank you Jesus for rapid recovery.

I had a word of knowledge for a headache during worship. I waited until worship was over to give it. One of the worship team was the one. A quick prayer commanding it to go and it immediately left! Thank you, Jesus.

Tuesday evening the woman whose neck was healed last week told us it started to come back and she laid hands on herself and it left right way. Praise Jesus!

Wednesday evening after the message, the speaker called forth those in need of healing and for some of us to come and pray with them. A man came forward with pain in both knees. I laid my hands with permission on both knees and commanded in the name of Jesus for the pain to go. Then I had him walk away and on his way back he told me that the pain was all gone. Praise Jesus! Then a woman who had had a knee replacement was also in pain in both knees. A quick prayer and she was doing things she was unable to do and pain was gone! Thank you, Jesus

Thursday evening a man came with pain in his neck, back, and all over. He could not lift anything with his arms, bend over a touch his toes, move his neck left and right. He was in pain and stiff. He also said he had congestive heart failure. A number of us laid hands on him. I declared a new heart in his body and for all pain and stiffness to go. I had him

walk around, move his neck, touch his toes, and lift a wooden stool with each arm. Praise God he is healed! Prayed for a woman with a walker afraid to let go of it. When we were done she was walking lightly holding our hands, then the man who was healed walked with her. Thank you, Jesus.

Saturday morning I prayed for a woman with ringing in her ears. Thanks you, Jesus for removing all trace of that ringing. Also prayed for a man with herniated disks in his back, arthritic pain in his elbows and knees. Taught on who is in Him and who he is in Christ. And about the authority, power, and anointing he has in Jesus. That Jesus died for more than just his sins--He died for all our sickness and disease as well. Walk in it. I had him stand after I laid hands on his elbow and commanded healing in all areas. As he walked all pain was gone. Thanks you Jesus!

Saturday evening I prayed for a woman with a headache. It was in various places--near her left temple, then over her eyes. We prayed a few times with some results. Then I had her command healing and after a couple of times all pain was gone. Thank you, Jesus!

Tuesday evening I prayed for a woman after the teaching. She could not see clearly out of her right eye. And her and her sister (not in FL) diagnosed for years with rheumatoid arthritis with evidence in deformed hands and pain. We commanded the eyes to be healed. For cataracts to go and her double vision in the right eye to be healed. After I prayed I had her do the same and the right eye cleared. Thank you, Jesus. Then we commanded the rheumatoid arthritis to be bound and to leave and for everything damaged by it to be restored like new. For her hands to be restored and her fingers to straighten. Her only pain was in her left hand at the joint of her pinky finger. She laid her right hand on that place and commanded it to be gone a couple of times. It left. We also prayed over the healing cloth she took tonight to send to her sister and one for herself. Praise God!

Wednesday evening I was able to pray for a young man who has had a broken right wrist for over 4 weeks. The doctor is telling him it is not healed and he has to have a screw put in it or the bone will deteriorate. I had him lay his own hands on the wrists and command the bone to be healed. For all the muscles, ligaments, tendons, and nerves to be healed. We were in agreement that the doctor will see him and declare that all is finished. He was also dealing with a cold or something, so we cast out a spirit of infirmity and commanded total healing in the name of Jesus. Praise God! (Follow up with doctor a couple of weeks later. Doctor said his arm was totally healed!)

Saturday evening I prayed with a man with pain in his left knee. And with a woman for

peace in her family.

At a Sunday luncheon I prayed for a man's left knee and when I placed my hand on his knee I felt heat in my hand. This is unusual for me. My hand usually feels cool. He told me he was feeling tremendous heat. I left my hand there for a while after praying for complete restoration. After a little while of still feeling the heat in his knee, he told me the heat had gone all the way down to his foot. I told him this was evidence of Holy Spirit healing his nerves all the way down to his foot. Thank you, Jesus.

Wednesday evening a woman had pain just under her ribs and around to the back. I had her lay her own hands under her ribs and I laid my hand on her back. We commanded in the name of Jesus for the pain to go and for the muscles and tendons to be healed. Some relief. Prayed again with a little more relief. I saw a couple that has been attending the discipleship class on Tuesday and had them come over a pray with her. They prayed a short prayer as they have been practicing each week and almost all the pain had left. I told the woman that she would awake with no pain. Thank you, Jesus. I received a text from her at 8:00am telling me she awoke totally healed! Praise God!

Saturday morning I prayed with about thirty people. They were either blessed and given a brief word or I was able to pray for a specific issue. A few had diabetes and we commanded that spirit to leave and for their pancreas to be healed. A woman came over to me for a hug and to tell me she got her social security. This is what we declared last month when praying with her. Another lady had back pain. And one with multiple sclerosis. Proclaimed a creative miracle for a new large intestine for a man who had it removed. Also came against any recurrence of cancer in him or any of his family. A man who has had two heart attacks and was dealing with liver issuer. Commanded both the heart healed and the liver. Thank you, Jesus for all you did in these people this morning.
