

Testimonies May 2018

Woman with left shoulder and knee pain. Claimed she had arthritis. I explained it was a spirit. Grew out her legs. Left leg was shorter than right. As I commanded them equal the left leg grew too much and then the other became equal with it. Commanded the spirit out and told pain to leave knees and shoulder. Had her walk a little and she said she was much better. Thank you Jesus.

Woman with back and hip pain. With permission I laid my hand where the pain was and commanded in the name of Jesus for the pain to leave. I held my hand there for a couple of minutes and then asked her to walk and come back. The pain was greatly lessened. I did it again and when she walked it was gone. Then she asked to get in and out of the car to see if that twisting movement was pain free. Not quite. I laid my hand on her while she sat in the car. She got out and all pain was gone. Thank you Jesus.

Before the meeting started a woman was in pain in her lower right back. We placed our hands on her and commanded the pain to go and for whatever was causing it to leave in Jesus name. Had her take a few steps and it was almost gone. Had her command herself for the rest to go and it did.

Later a man was suffering pain in his left hip. I checked his legs and they were off about an inch. I commanded the legs even and for all pain to leave. When he walked it was lessened but still present. I placed my hand on him again and said thank you Jesus. The anointing was very strong. After one more time the pain was gone.

Prayed a blessing over a woman who had not come to the church before. She did not want prayer for anything specific. In the course of blessing her, with my hands on her head with permission, Holy Spirit gave her a word of encouragement and spoke healing into her from the top of her head to the bottom of her feet . Praise Jesus.

While working on two computers at an elderly couple's house I found out he was having memory problems, heart issues, and arthritis. His wife had not been sleeping. He was catholic and claimed walking with Jesus. We spoke about the simple gospel and led him thru a confession of faith to receive Jesus as his Lord and savior. I was then able to pray with him commanding arthritis to go and declared a creative miracle of a new heart and for a sound mind. Then I held his wife's hands and commanded whatever was stopping her from sleep to leave. And for a good night's sleep. Thank you Jesus.

Man came into the church while we were holding a healing teaching. God sent him. He had pain in his back and discomfort in his neck. We sat him in a chair and checked his legs. The left was an inch shorter. I commanded the legs to be even in the name of Jesus and the back to be

healed and pain free. I told him to stand and walk towards the drums and return. When he turned around all pain was gone.

Many were touched when others prayed for them during our hands on healing class. Many were prayed for but these are two I remembered.

A woman with a pain in her lower back. With permission I placed my hand on the small of her back and commanded healing and for all pain to go. When I took my hand away the pain was gone. Thank you Jesus.

Another woman was excited when I mentioned that arthritis was a spirit and had no right being in us. I held her hands and told that spirit to go, for all pain to leave, and for anything damaged by it to be restored in the name of Jesus. The pain instantly left her body. She was ecstatic as she had been carrying this pain for a long time. Praise Jesus.

The waiter we had tonight was walking with a little bit of a limp. After we had finished our meal I asked him why the limp. Turns out he had a lifetime of surgeries every since he was young and one of the things that he deals with on a regular basis is rheumatoid arthritis. Just before we left I had an opportunity to ask if I could pray for him. He told me he was a believer and would love to have prayer. With permission I laid my hand on his chest and commanded that spirit of rheumatoid arthritis out of his body. We commanded all pain to go and for everything that was damaged by arthritis to be restored. For all pain to leave his body, in Jesus name. He hugged us, thanked us and we told him we would see him again.

A man with back issues. Set him down and checked his legs. One was an inch shorter than the other and he remarked yes I know that. In the name of Jesus we command his legs to grow out and for back to be healed. The leg grew out that inch. I had him walk over to the drums and back and all the pain was gone. I had him walk over to the drums and back and all the pain was gone. Thank you Jesus. Also prayed for a tremor in his right hand that he's had all his life. I asked him to raise his arm after praying and he said he couldn't because he had titanium rods there. With my hand on that shoulder I commanded healing and full mobility. He was able raise his arm in high. Thank you Jesus.

On the way out we met up with a man that was healed earlier in the week of pain in his back. Some pain had returned. We touched his back and once again commanded it to leave. As he walked the pain left. We again explained that he could do that too. That because of who was in him, he has the authority to command the pain to leave. Praise God.

I was prompted to get up and talk to a man sitting in McDonalds this morning. We chatted for a while and was able to pray for him for favor in a job he had just received word from that he was hired. He had been successfully through a fought with cancer and is in remission. We agreed that all cancer was gone from his body and prayed healing in him. Thank you Jesus for pushing me to get up and go to him.
