

November Testimonies 2014 Florida

On a Saturday evening I attended Edgewater Methodist Church. I arrived early and was sitting in the lobby having a cup of coffee. Pastor Dan came to find me. The new worship leader fell and hurt his left arm. Lots of pain. Pastor asked me to pray for him. All pain left. Thank you Jesus. Then after service I was standing waiting for anyone with prayer needs to come and the pastor came over. He said he had a pain in his foot all day as he was walking over for prayer most of it left and then I laid hands on him and the rest of it went. Praise Jesus!

Went to a new home church in Englewood on Monday afternoon. Good meeting. God gave me a word of knowledge about someone that had a stomach issue and one lady said she didn't have a problem now but she has stomach issues so I got to pray with her. Later when we had all finished praying in a circle she mentioned that she felt the Holy Spirit and she hadn't felt His presence like that in a long time. Praise God!

Later one of the men was having a headache. I placed my fingers on his right temple and commanded healing. It started to go. Then I placed my fingers there again and just said "Jesus". He said he felt something move and then all pain left. Yeah God!

Preached at New Seasons Ministries on Thursday evening. During praise and worship someone spoke out in tongues and I gave the interpretation. Also had prophetic words for a couple of people and I spoke them over them. All were healed. I had two words of knowledge. One was for tingling in the fingers and another for headaches. Women came forward for both. Both were healed.

The first woman said she had pain in her right thumb and tingling in the little fingers of that same hand. I laid my hand on her hand and commanded the spirit of pain to leave and for the nerves to be healed. The tingling left, but the pain in the thumb was still there. I had one of the leaders in the room lay her hand on the thumb. Then we commanded the pain to leave again and just said "Jesus" over the affected area. They both began to fall in the spirit as Holy Spirit took over. All pain left.

The second woman had a headache and allergies, if I remember correctly, we cast out allergies and commanded the headache to go. Her sinuses immediately cleared and the headache left. Then we prayed for another that was dealing with allergies and her sinuses cleared as well. After we were all done, another person came up to me and said she was also having allergy problems, but when I prayed for the other two her's cleared up.

Many came forward for arthritic pain in all parts of their body. I commanded arthritis out of them and for pain to leave. In every case they were healed. Also grew out many legs and arms. One person had a curved back and one leg longer than the other. I grew out her legs

and commanded her back to be straight. When I told her to do something she could not do before she raised her hands over her head and proceeded to go down and touch her toes. Straight back and no pain. Thank you Jesus!

God healed knees and hips. One man said he had knee pain. When I prayed for his knees he said he had a burning in both legs above the knees. We prayed again and had him walk around the room. When he returned all burning and pain had left.

A few people had hearing problems. So I cast out the spirit of deafness and they claimed they could hear better. Many took home healing clothes to give to others. Praise Jesus!

Spoke on healing prayer at a luncheon after the morning service at Edgewater UMC. There were about 35 in attendance as I gave a short testimony and taught on healing from God's word. I included a brief description of the seven myths that prevent some people from receiving a healing. After teaching I imparted boldness on them and then activated them in healing by having those that needed healing come forward. About half of them stepped out. I had the other half come and lay hands on them and gave a brief description of what to do next.

I laid hands on one lady that had a deformed left hand from a stroke she had received years ago. She could not bend her fingers and the hand was stuck in an almost straight position. After commanding healing a couple of times she was able to make a fist and any pain left.

Then the others commanded healing in those they were praying for. All received a healing. Praise God!

As we were leaving the building I was able to pray with one more. She had pain in her right side from carrying a heavy bag. Also back pain. I grew out her arms. They were off about four inches. And they grew out too long the other way, then back and forth until they were even. All shoulder pain left. I had her sit down and grew out her legs. Same thing happened, they grew out and back until they were both even. I commanded pain to go and for her back to be straightened and strengthened. She stood up and reached down to touch her toes. All but one area was pain free. Still some pain on the back right hip. With permission I laid my hand there and said Jesus, Jesus, Jesus. All pain left! Wow God!

Received this on Facebook on Monday:

We met and you prayed for me yesterday at the meeting at church. I'm not boasting about me or you but I have good news I am healed. My left leg grew 1" longer. I feel great thank you for being there for God's people. Thank you Jesus! Amen

BDG on Tuesday evening. Good discussion and prayer. Had one member lay hands on a woman's legs. She was then able to walk across the room on her knees, something she could

not do before. Yeah God!

Went to friends for Thanksgiving dessert. One of their guests was in need of prayer. God started working as soon as I sat down. He healed this man of past trauma in his life, then removed a cloud in his thinking and renewed the areas of his brain damaged from a fall, then I grew out his arms and God healed neck pain. Then he brought up an issue with his left shoulder. God took that pain away as well. His wife was having a problem with not being able to write with a pen or pencil. Stiffness and pain in fatty part of her right thumb. He took away the pain and she was able to write without pain. Praise Jesus!

We had a substitute at the Y on Friday. She mentioned a problem she was having with her right rotator cuff, So after class I asked if I could pray with her. God grew out her arms and removed all pain. She was able to move her right arm back the same distance as the the left. Thank you Jesus!

Attended Englewood Bible Church on Sunday morning and prayed for one woman with a swelling in her right hand. After prayer she was able to close her fist. Then after eating at a local restaurant I prayed with a woman with an infection. Thank you Jesus for using me again!
